

EUSteelForum

High Level Training Course for the European Steel Industry
edition 2009

The main aim of the **EUSteelForum** – a highly concentrated short training course for operatives of the steel industry organised by ICSIM and Stahlinstitut VDEh with the support of Federacciai, Unesid and Cardiff University – is to offer the conceptual and operative tools necessary to cope with the complex situation faced by companies in an increasingly competitive and global steel market. **EUSteelForum** participants can also earn 20 “M” level Masters credits, validated by Cardiff University.

The organisers are seeking to offer an intensive programme, which will be focused on the following set of aims:

- ❑ provide in-depth knowledge of some of the main issues affecting the steel sector;
- ❑ provide a focus on recent managerial and technical developments such as new business management practices, politics, sustainability etc.;
- ❑ provide an update on technological innovation, concentrating on the development of applied research directed at both product and process innovation;
- ❑ analyse changes in company and industry environment resulting from the end of the ECSC Treaty framework and the full inclusion of iron and steel in the wider Treaty of the European Union;
- ❑ offer analytical tools adequate to an understanding of the trends in company structure, management, performance and
